Available beginning January 19, 2026, this latest release brings together a stunning new artisan finish collection, two new stain colors, innovative storage solutions, and fresh design elements that reflect today's most sought-after trends.

Whether you're designing a complete home or refreshing a single room, these new offerings provide endless possibilities to create spaces that truly reflect your style and enhance your lifestyle.

NEW FINISHES

CERUSED FINISHES

This masterful, hand-crafted finish technique celebrates the beauty of the wood grain. Once stain is applied by hand and sealed, a Cerused finish is applied to the entire surface and then wiped by hand to highlight the open grain. The pigmented filler, historically called “liming” or “cerused” is a contrasting pigment that fills the open grain of Oak and highlights the grain texture with a soft contrast. Cerused is an artistic, hand-detailing technique that will have unique, subtle variations with each application.

These reinvented laundry spaces offer designers a fresh canvas to create stunning, inviting, multi-tasking work zones that enhance daily living.
