FINISHES

StarMark Cabinetry boasts a range of stunning finishes, from timeless classics to the latest on-trend options. Our selections can be applied to a variety of natural wood species, ensuring your space feels both contemporary and inviting.

MOXIE | MAPLE | DUSK FERN & MELROSE

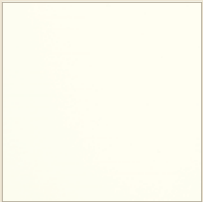

FINISHES

TINTED VARNISHES

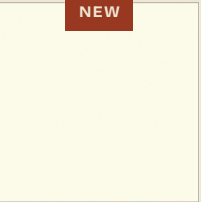

The best way to describe Tinted Varnish is to say it gives cabinetry a paint-like finish. However, Tinted Varnish is much more durable than paint. Throughout the country, this type of finish is also called “enamel” or “opaque”. Tinted Varnish is available on Maple, Red Oak, Quartersawn White Oak and MDF door styles, and each material yields a different look. The grain of Maple wood is concealed by Tinted Varnish and the grain of Red Oak and Quartersawn White Oak shows through. Please note, when Tinted Varnish colors are specified for Maple, veneered center panels in doors are replaced with HDO material, and solid 3/8” reverse flat panels and solid 5/8” raised panels in doors are replaced with 100% MDF. These materials assure the best possible finish.

FINISHES

CUSTOM COLOR

Sometimes, homeowners dream beyond StarMark Cabinetry's standard finishes. That's why we offer custom programs to bring your unique vision to life, ensuring your cabinets resonate with both personal style and elegance.

Each program helps you create a unique space, blending timeless elegance with modern design. For final touch-ups or repairs, order a quart of stain or a 3-oz bottle of tinted varnish.

BESPOKE CUSTOM HUES

Color inspiration is deeply personal, whether from heirloom furniture, a beloved painting, or rich fabric. Our skilled Fieldstone Cabinetry finish artisans craft custom stains and paints to perfectly match your chosen hue, infusing your home with a truly special touch.

COLOR BY NUMBER

If you find the perfect color at Sherwin Williams® or Benjamin Moore®, simply note the swatch name and number. We'll match it flawlessly, blending precision with personal choice.

COLOUR COUTURE FALL 2025 COLLECTION

ENCHANTING EARTH

The Colour Couture program keeps StarMark Cabinetry ahead in home decor trends, offering a fresh, current palette every 18 months. The new Enchanting Earth Collection conveys the gentle transition and warmth of the seasonal change, infused with the serene mood of colors that bridge beautifully between earthy stains and off-white neutrals trending.

FINISHES

STAINS

A stain is a basic yet substantial finish that adds color to wood while revealing the beauty of the grain. The wood type affects the color of the stain, so the same stain will look different on each wood type. In some cases, the difference is dramatic. For the richest, most consistent color coverage, we apply the stain and then hand rub it into the wood. There are no machine shortcuts: elbow grease is the only way to coax the luster from stained wood.

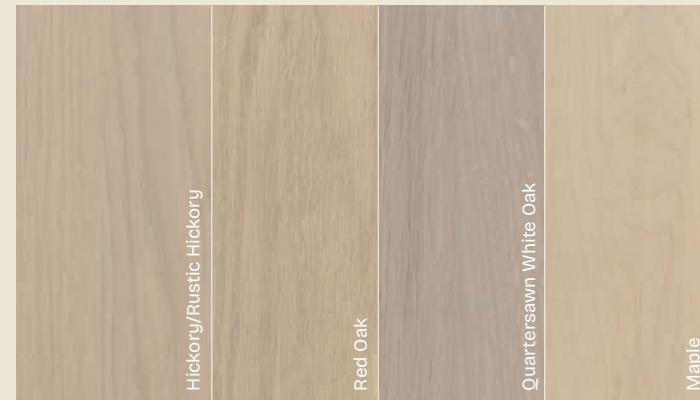

MATTE TOPCOAT

Matte Topcoat is a less reflective finish than our standard sheen. It absorbs rather than reflects light, therefore providing more uniform color across the cabinetry in a room.

Think in terms of the paint industry. A satin or flat option is comparable to Matte Topcoat, and Semi-Gloss is comparable to our Standard Sheen.

WOOD TYPES

The varied beauty of different wood species in cabinetry brings a unique character and warmth to every piece, from the rich grains of walnut to the subtle elegance of maple. Each type of wood tells its own story, adding a timeless and natural charm to your home.

SILVERCOAT

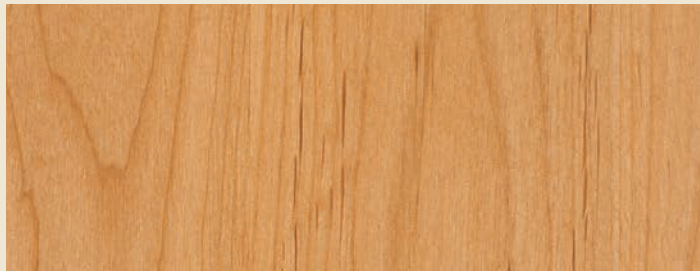

Silvercoat silver ion technology provides the proven benefits of silver ion technology, known to inhibit the growth of various microorganisms.

INVISIBLE, EFFECTIVE PROTECTION

SILVERCOAT is a non-toxic coating which acts as a protective barrier to help guard against the infiltration and proliferation of destructive microorganisms.

HOW IT WORKS

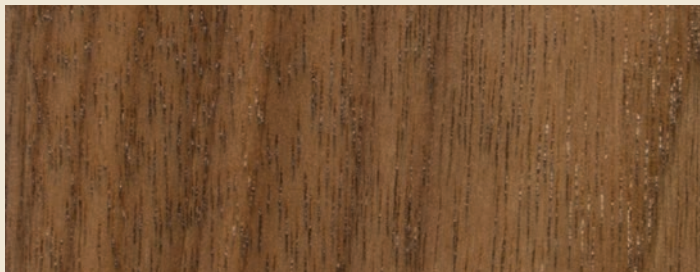

Research has shown that relatively small amounts of silver can disrupt bacteria's metabolism by preventing it from converting nutrients into energy, which inhibits bacteria survival, reproduction and colonization.

ALDER is a softer wood with a fine straight grain and even texture. Color is light brown with yellow or reddish tinge, with little difference between heartwood and sapwood. Alder does not evolve in color or darken when exposed to light or heat as other woods do, and takes stains and finishes well. More than some of the other woods, care must be taken to avoid damage due to its softer nature. Some small tight knots can be found with standard Alder.

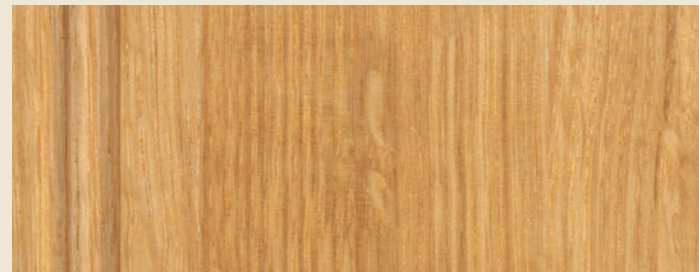

MAPLE is a versatile hardwood with a fine, smooth grain. It varies in color from nearly white to a slightly reddish brown. Mineral or sugar streaks occur naturally in Maple and can vary from piece to piece. Variations will be more noticeable in lighter stains.

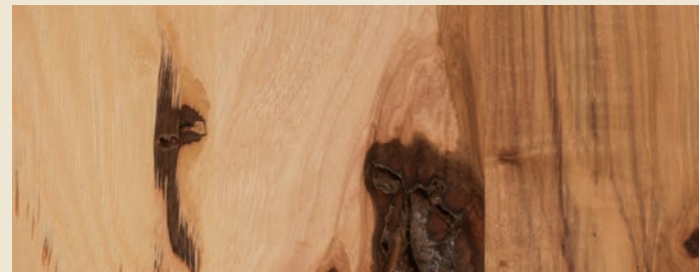

WALNUT is a strong, stable American hardwood known for wide color variation. It ranges in color from creamy white to a medium purplish brown. Walnut cabinetry will have both flowing grain and straight grain. This combination is a treasured characteristic of Walnut, and is showcased when Walnut is finished in Natural. However, Walnut takes all available stains well. Walnut is a favorite choice for furniture and furniture grade cabinetry, such as StarMark Cabinetry.

CHERRY displays a distinctive grain pattern and warm color. The color ranges from nearly white to dark reddish brown. Dark pockets, pin knots, and random streaks are common. More than most woods, Cherry will darken when exposed to light, especially in light stains. The more sun Cherry receives, the faster it will darken. This will be most evident in new wood and will slow as it ages.

QUARTERSAWN WHITE OAK is known for distinctive rays and flecks in the wood grain, with colors that range from nearly white sapwood to darker gray/brown heartwood. Quartersawn White Oak takes stain fairly evenly and is known for strength, durability and the beauty that comes from the cut of the wood. Cutting from the heart of the log, rather than the edges, gives visibility to long radiated rays that are the essence of Quartersawn White Oak.

RUSTIC HICKORY shares the same color and grain as Hickory, but is characterized by knots, burls and mineral streaks found on center panels, stiles and rails of the door, and on the drawer headers, which could impact hardware placement. Knots will be sound and will be closed, but certain angles could show light through the knots. Glazing rustic wood types will enhance these unique characteristics.

HICKORY is a heavy, strong wood. It is known for flowing, vibrant grain patterns and dramatic color variations. Hickory can also exhibit random pecks, burls, and mineral streaks. Hickory's color ranges across a wide spectrum, from nearly white to dark brown.

RED OAK is a strong wood with a long linear grain, often displaying tiny rays. You may notice small pinholes and tight knots. Color will range from golden blonde to deeper reddish tones. This cut of Red Oak is known as flat sawn.

RUSTIC ALDER shares the same color and grain as Alder, but, is characterized by knots, burls and mineral streaks found on center panels, stiles and rails of the door, and on the drawer headers, which could impact hardware placement. Knots will be sound and will be closed, but certain angles could show light through the knots. Glazing rustic wood types will enhance these unique characteristics.

FINISHES

GLAZES

Glazes are available to layer over both Stains and Tinted Varnishes. We apply the glaze by hand and then wipe it off by hand. When the craftsman wipes off the glaze, he or she can best use the glaze to define the details in that particular kitchen. The profiles on a door and drawer, and other details on cabinetry, such as corbels, rosettes or shells, are highlighted when glazed. We glaze every part of your cabinetry by hand—doors, drawers, moulding and panels.

FINISHES

SPECIALTY
FINISHES

Specialty Finishes are cabinetry finishes that take your room to a whole new level. Artistic effects are used to refine colors, add character, and in some cases, a vintage feel.

CHATEAUX
Chateaux is a specialty color for Cherry cabinetry. Chateaux is created by randomly applying several distressing techniques, softening all edges, padding the edges to create shadowing, and adding speckling to accentuate the distressing. Patina is accomplished with 1. Rounded corners 2. Worn edges 3. Knife cuts 4. Worm holes 5. Rasping 6. Dips and 7. Light chain distressing that we hand apply to drawers, doors and throughout the cabinetry. A protective topcoat completes the look. The finish is oven cured for durability. Brown Chateaux colors are shown on this page. Chateaux is available on Cherry door styles.

ANTIQUITY
A specialty color for Alder and Rustic Alder cabinetry. To create Antiquity, artisans apply the Ebony glaze by hand and brush it. The resulting look echoes a time-worn patina. Antiquity is available on Alder and Rustic Alder door styles.

VILLA
The Villa finish results in a look that suggests brush strokes along the face of the doors and drawers, and any other finished part of the cabinetry. The color and brush stroke technique will vary from door to door and will blend throughout the cabinetry. Available on Maple door styles.

WEATHERED
The Weathered finishing technique opens up the soft grain of the wood, so you'll see more depth and more texture. The beauty of real Red Oak takes center stage! A protective topcoat completes the look. The finish is oven cured for durability. Weathered or Weathered Snow is available on select Red Oak door styles finished in any Stain or Stain with Glaze combination and any Tinted Varnish or Tinted Varnish with Glaze combination.

FINISHES

ARTISAN
EFFECTS

StarMark Cabinetry Artisan Effects add distressing techniques that capture the essence of aged elegance, adding a timeless charm to any room. Skilled artisans apply distressing that involves carefully abrading the surface to reveal underlying layers. This gives cabinetry a weathered, vintage appearance that tells a story of history and character.

HARBOR | MAPLE | MUSHROOM
WITH COTTAGE DISTRESSING

HOMESTEAD
A specialty color for Alder and Rustic Alder cabinetry Homestead Fog is a gray tinted varnish with several distressing techniques that are applied randomly and heavily. Distressing marks are 1. Rounded corners 2. Worn edges 3. Knife cuts 4. Abundant worm holes 5. Rasping 6. Dips 7. Light chain distressing and 8. Chiseling. They are applied to drawers, doors and throughout the cabinetry. A protective topcoat completes the look. The finish is oven cured for durability. Homestead Fog is available on Alder and Rustic Alder door styles.

COTTAGE DISTRESSING
Cottage Distressing is a sweet, welcoming look created with rounded corners and worn edges. A third technique, light chain distressing, is optional. Glaze brings out the wood's unique texture, and a durable topcoat completes the process, protecting both the color and the marks. Cottage Distressing is available on any Stain with Glaze combination and any Tinted Varnish with Glaze combination.

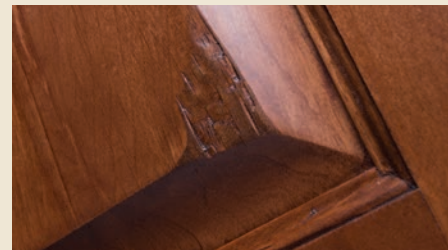

OLD WORLD DISTRESSING
Old World Distressing blends your new cabinetry with today's popular distressed furniture pieces. Certain distressing techniques are randomly applied to the face of your cabinetry throughout the design. These techniques are rounded corners, light chain distressing, worm holes, dips, rasping, knife cuts and worn edges.

FINISHES

DISTRESSING TECHNIQUES

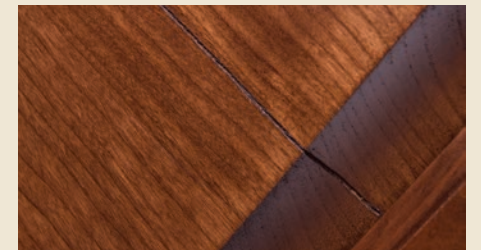

StarMark Cabinetry uses several techniques to add character and appeal to cabinetry. All of these distressing marks are added by hand. There is no machine and there is no robot that can successfully duplicate what the eyes and hands of an artisan achieve through personal handling of the cabinetry.

DOOR STYLES

StarMark Cabinetry offers an extensive collection of door styles, each designed to bring your vision to life. With a range that spans from classic raised panels to sleek, modern flat fronts, you can craft a space that not only reflects your unique style but also brings a sense of serene beauty to your home.

DOOR STYLES

OVERLAY

PARTIAL OVERLAY

Sometimes referred to as standard overlay, these doors and headers leave 1” reveal of the face frame around the outside. Smaller doors and drawers allow them to clear millwork without modifying the cabinets in close corners or when installed next to walls.

FULL OVERLAY

Doors and headers cover most of the frame leaving ¼” reveal of the face frame around the outside. This gives a much cleaner look than traditional and a more European style. Wall and tall cabinets have a 1” reveal above the door for easy installation of decorative moulding.

DOOR STYLES

INSET

Inset doors and headers are built flush with the frame. This look goes back to the golden days for that timeless heritage look. This look can be done where the frame is flat and flush with the doors and drawer fronts or a decorative bead can be routed into the face frame to give a more elegant appeal.

CUSTOMIZATION

StarMark Cabinetry offers a vast array of customization options, enabling you to infuse your space with thoughtful design and intricate detail.

DRAWER HEADER OPTIONS

5-PIECE (Standard)
A five-piece drawer header features a framed construction with a center panel, adding a classic and detailed look.

SLAB
A slab drawer header presents a sleek, modern appearance with a single, uninterrupted surface.

SCULPTED DRAWERS

In cabinetry, rolled drawer fronts have a smooth, rounded edge that matches rolled raised panel doors like Ridgeville, while scooped drawer fronts feature a concave, scooped-out center that aligns with scooped raised panel doors like Breckenridge. We ensure the right drawer front profile is matched to the selected door for a cohesive and aesthetically pleasing design.
